

## Steps to run the project:

- Open the project in VS code.
- In terminal run `npm install` and `npm -g nodemon` (to install nodemon globally).
- Then give command `node app.js` or `nodemon app.js`(if nodemon is installed globally) to run the application or you can use `npm start` also.
- Go to browser tab and write `localhost:3000` then the application will start.
- The default credentials for teacher are  
Username: admin  
Password: Admin1!  
You can register new teacher also.
- Database used is mongo db atlas in which we have used our own cluster.  
If one wants to make another cluster can make it using mongo db atlas and require its connection string in `app.js` file of application code.
- For smooth running of application internet is required.
